HEPCO & BECKER

HISTORY OF OUR COMPANY

The history of HEPCO & BECKER dates back over three decades. The company began as a small metal-working business producing motorcycle accessories. The company's success was built on marketable products incorporating a high degree of technical expertise, which were continuously refined over the years.

The 1990s saw the creation of another side of the business that has expanded continuously. INDUSTRIAL CASES and TOOL CASES were produced at the factory in Höhrfröschen. Following the formation of this new division, production and selling capacities were expanded and new jobs created.

HEPCO & BECKER is characterised by a perfect price/performance ratio and superlative quality, all backed up by swift delivery capacities and excellent service. The relocation of the company offices and production facilities to Pirmasens in 2009 opened up new capacities and possibilities for implementing customer requests even better and faster than ever.

Many well-known companies source their tool and custom cases from us because they can trust our quality. Based on its many years of manufacturing experience, the continuous improvements to its high-quality products and an ability to realise customer requests, HEPCO & BECKER has earned a strong reputation in Germany and Europe. As a result, the company is now one of Europe's leading manufacturers.
