## A COMPLETE SOLUTION - A COMPLETE LIFE CYCLE

### FORGING PARTS AND SINTER

By drop forging steel and machining, we make forging parts for control mechanisms and gearboxes, supporting parts of chassis, components for drive shafts and sinter forging parts for the most renowned European and global makers of vehicles: VW, Audi, Renault, Dacia, BMW, ZF Lemförder & ZF Lenksysteme, Jtekt, GKN, Arvin Meritor, BPW, Schäffler KG, Betek and Cimos. Various certificates, tests and awards for excellence confirm the quality of forging parts made in Unior.

### SPECIAL MACHINES

Unior mechanical equipment provides comprehensive solutions, ranging from the concept stage to the finished product. Besides specific CNC machine tools for the serial working of aluminium castings or forging parts, Unior also offers flexible production cells, machines for deep hole drilling, for working ends and for working chassis parts, machines with a rotary table and special purpose machines. Unior is a supplier of machines for renowned car manufacturers such as VW, BMW, Audi, Daimler etc.

### TOURISM

Unior, which operates in the shelter of the Pohorje mountain range, surrounded by an attractive landscape, is developing two interrelated tourist centres. The Rogla climatic health resort, Olympic centre and winter sports centre is especially interesting for professional athletes and recreational athletes, while the Terme Zreča spa is ideal for those seeking health and wellbeing. Both connected health resorts with their modern capabilities are an excellent choice for family holidays, health rehabilitation and preparation for top athletes.

### HAND TOOLS

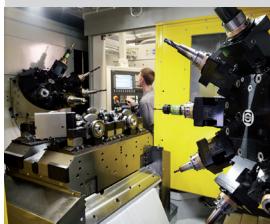

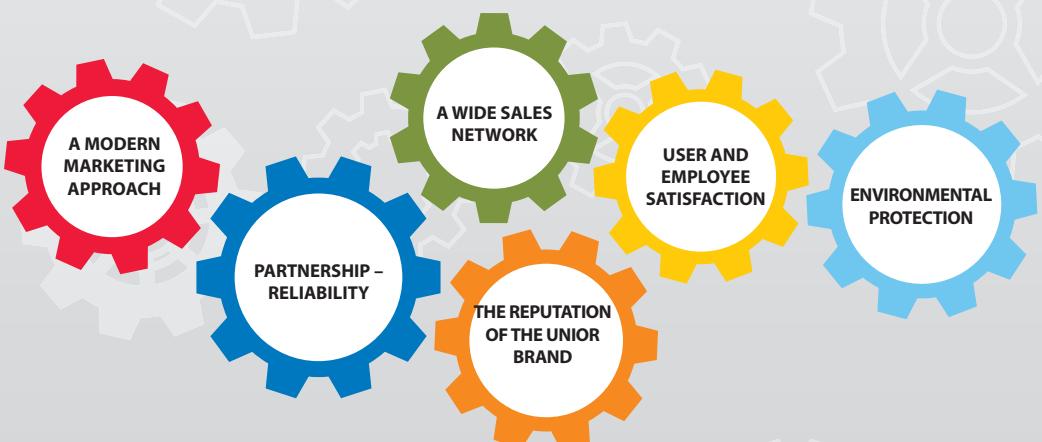

The development of Unior hand tools constantly follows the requirements of professional and amateur craftsmen all over the world. Top quality materials and original design solutions are the basis of the extreme practicality, effectiveness and long service life of more than 5,500 hand tools. The availability of tools is ensured by a multi branch distribution network. With its cold forged products, Unior is an important supplier of tools for the European industry.

## ŠTORK STEEL

Co-owner of the  
steelworks material:  
chrome vanadium  
rods

## PARTNERSHIP

## Milestones of the Unior corporation

### From Styria to the world

On the outskirts of the Pohorje Mountains, the first ironworks (foundries) were established in the 18th century. They operated as larger forges, in which land and tradesmen's tools were fashioned by hand.

In 1919 the Štajerska železoindustrijska družba (Styrian Iron Industry Company) forging plant, with the shortened name Štajerska Zreče, was established. It produced forged hand tools for farming, forestry and various other trades.

In 1950 the plant, burned down during the war and partially renovated in the years following the war and bearing the new name of Tovarna kovanega orodja Zreče (TKO) came under state ownership. New capacities (tool shop and hand tools mechanical processing plant) comprised the basis for developing two production lines: hand tools and drop forgings.

In the 1970s the plant equipped with a new development strategy also obtained a new name: Unior, tovarna kovanega orodja Zreče. The new name was formed from the words "Univerzalno Orodje" (Universal Tools), by which the company had been known for a long time.

In the mid-1970s Unior began building the Rogla climatic health resort and Olympic centre on Pohorje, and a few years later construction of the Terme Zreče spa commenced and with it, the Tourism Programme.

In 1997 this successful Slovenian company with stable international partnerships was transformed into the UNIOR, d. d. joint stock company. Already at that time, the company had been operating in accordance with ISO 9001 quality standards.

By the 1980s Unior had established its name as an important partner of the European automotive industry, namely as one of the largest European producers of light forgings and as one of the largest European producers of connecting rods for petrol engines. Initial development was enabled by a contract with the Renault concern, on the basis of which a joint-venture plant for the production of forgings was built in Zreče. At the same time, Unior developed its production of homokinetic joints and machine tools, initially intended for the company's own needs.

Unior Joint-Stock Company is today one of the largest and most important Slovenian exporters. With its five production segments company follows the tradition of a high quality and innovation. Committed to high utilization of own capacities, Unior enhances the brand awareness through more than 2400 employers and 32 group companies around the world.

## INSULATED TOOLS

### Ultimate protection

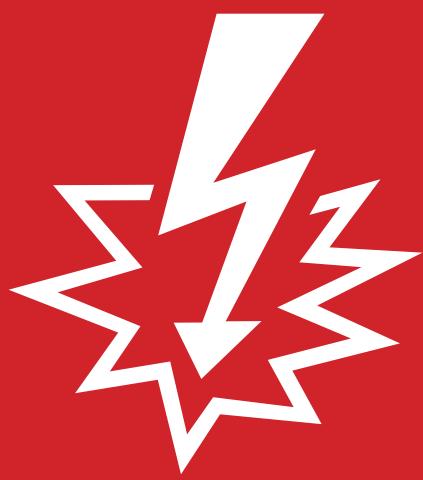

Unior insulated VDE tools ensure ultimate protection even when used around live circuits with up to a 1000-volt potential. The utility of all tools is thoroughly verified by means of the impact strength, electrical, flame-retardancy, insulation adhesion and stamp tests, with each tool being tested individually.

### High-quality steel

Insulated wrenches, pliers, shears, screwdrivers and other tools for working with electrical and other power installations are made of high-quality tool steel with added protection, and designed for simple and safe use.

### VDE regulations

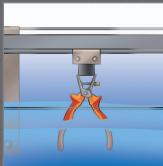

VDE insulated and tested according to the VDE regulations, Unior tools for work in electrically live environments meet the requirements of the internationally acknowledged European EN 60900 standard.

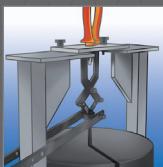

### FLAME RETARDANCY TEST

The flame is applied to the test piece for 10 seconds. The test piece is acceptable if the height of the flame on the burning handle does not exceed 120 mm in an observation period of 20 seconds after the burner has been removed.

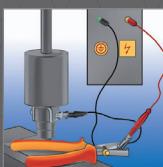

### ELECTRICAL TEST (10kV)

Before testing the tools are immersed in a bath of water at 23° C for 24 hours +- 5 hours. The test pieces are acceptable if there is no electrical discharge, spark over or flashover, and if the current leakage is less than 1mA for 20 mm insulation.

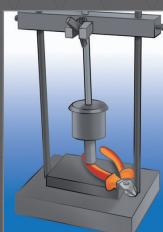

### INSULATION TEST

Before testing the test piece is heated to 70 C -/+ 2° C for 168 hours. The hanger is loaded with weights (500 N). The duration of test is 3 minutes. The test piece is acceptable if the handle remains firmly attached to the conducting part.

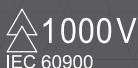

### STAMP TEST

The indenter is loaded with a weight of 20 N and is applied to the centre of the handle. The test is successful if the test piece subsequently passes the electrical test.

### IMPACT TEST

The test is carried out at an temperature of -23°C. The hammer is allowed to fall freely on the test piece 3 times. The test piece is acceptable if the handle is not cracked, broken or does not show signs of flaking.

Hand tools for live working up to 1000 V A.C.

Sign of the institution certifying the tools (VERBAND DEUTSCHER ELEKTROTECHNIKER).

A sign indicating that the tools are in accordance with the signed standard (DIN), which prescribes the basic demands for tools (dimension, hardness, mechanical testing etc.).

## Features of Unior's pliers

### VDE BI line

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- head polished
- surface finish: chrome plated to standard EN12540
- heavy duty double - component handles
- jet stamp UNIOR

### VDE DP line

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- head polished
- surface finish: chrome plated to standard EN12540
- double layered insulation VDE tools, double safety
- establish wear of your VDE DP tools, just in time

## Features of Unior's wrenches

### Wrenches

- material: chrome vanadium

### ORANGE AS A WARNING SIGN

The double plastic protection of the VDE tools ensures double safety, because it enables the recognition of worn out tools in due time. When the tool gets worn out, an orange colour appears (the second protection layer), which is a sign that the tool should be replaced immediately.

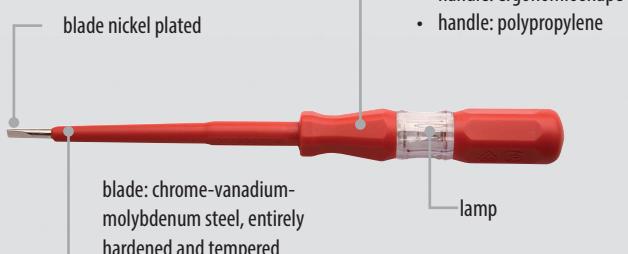

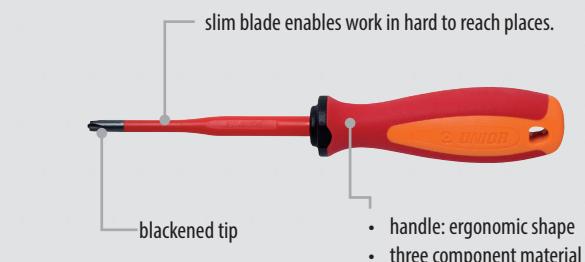

Safe tool

Worn out tool – immediate replacement

## Features of Unior's screwdrivers

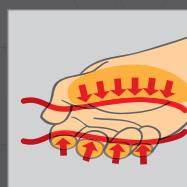

## ERGONOMIC HANDLE!

The combination of hard and soft surface improves the load factor and ensures smooth screwing. The handle was developed in such a way that it takes care of the user's health because it reduces the tension of the hand muscle.

Large hand contact area  
= more torque power

Ergonomic handle  
design = protecting your hand

**110/2VDEDP****Insulated single open end wrench**

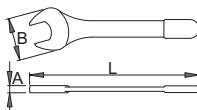

- material: chrome vanadium
- head: chrome plated according to EN12540
- made according to standard EN60900

**Advantages:**

- double layered - double coloured insulation for additional safety
- controled with electrical test

**Important!**

- if second layer is visible, replace your VDE tool with a new one.

### 250/1VDEDP

#### Insulated adjustable wrench

- material: chrome vanadium
- surface finish: chrome plated according to EN12540
- made according to standard EN60900

#### Advantages:

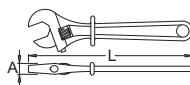

- double layered - double coloured insulation for additional safety
- controled with electrical test
- with scale

#### Important!

- if second layer is visible, replace your VDE tool with a new one.

#### Caution!

- Adjust the tool before using! Adjustment while working is life dangerous.

|               | ∅   | L   | A  | ∅  | ■    | ■         |

### 180/2AVDEDP

#### Insulated single ring wrench, offset 90°

- material: chrome vanadium
- head: chrome plated according to EN12540

#### Advantages:

- double layered - double coloured insulation for additional safety
- controlled with electrical test

#### Important!

- if second layer is visible, replace your VDE tool with a new one.

#### Usage

- For holding the nuts while screwing.

## 22 The first step to safe work

SOCKETS 3/8"

With the use of insulated ratchets and sockets VDE, you will forget all efforts and essentially improve the productivity of work. Because of its safety and simplicity, the high-quality tools will totally satisfy your expectations. A special feature is the lock system and mechanism for socket turnoff which enable faster use of the tool.

**236/2HXVDEDP**

**Insulated hexagonal screwdriver socket 3/8"**

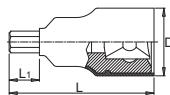

- material: socket: chrome vanadium, chrome plated
- material: bit: special tool steel, anticorrosive oiled
- entirely hardened and tempered
- made according to standard EN60900

**Advantages:**

- double layered - double coloured insulation for additional safety
- controled with electrical test

**Important!**

- if second layer is visible, replace your VDE tool with a new one.

## When you can rely on your tools

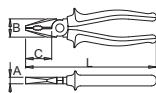

Due to universal use, these pliers are also intended for cutting and clenching. It is possible to clench flat or round material and to cut softer and hard wires and cables. Its strong and durable blades make this tool one you can rely on.

### 406/1VDEBI

With the universal pliers VDE you will be able to achieve an optimal transmission to the working platform without great effort. When clasping pipes and nuts, the pliers ensure a clean grip without any traction. With special anti-traction protection which stops your hands of directly touching the working platform and with that the possibility of finger injury during work is reduced. The adjustable jaw into 7 positions enables the jaws of the pliers to adapt to different types of work piece without changing the pliers.

**447/1VDEBI**
**Insulated waterpump box joint pliers**

- material: chrome vanadium
- drop forged, entirely hardened and tempered
- working surfaces induction hardened
- surface finish: chrome plated to standard EN12540
- heavy duty double - component handles
- made according to standard ISO 8976 and EN 60900

**Advantages:**

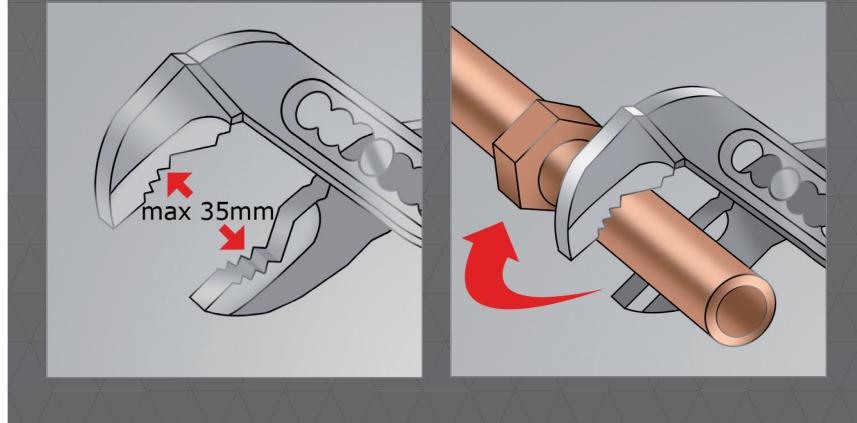

- jaw aperture adjustable in 7 positions
- A special bulge prevents fingers to be pressed between the handles of the pliers.

A

The production of the VDE pliers is based on constant quality control. In each stage of production, the pliers are individually checked and tested to prevent the possibility of failures on the tools and increases safety during use. The advantage of long round nose pliers is its exact clenching, bending, and curving of wires and making slings.

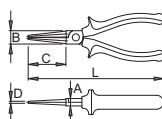

**476/1VDEBI**

### Long round nose pliers

- material: special tool steel
- drop forged, entirely hardened and tempered
- head polished
- surface finish: chrome plated to standard EN12540
- heavy duty double - component handles
- made according to standard ISO 5745 and EN 60900

#### Advantages:

- long points enable reaching of wires in hard-to-reach places
- minor possibility of damaging wires

VDE tools will surprise you each time of use. Thin precise points can handle difficult and impossible tasks and reach difficult-to-reach-places. The long bent jaws enable simple and precise clenching of nuts and screws.

**512/1VDEBI****Long nose pliers with side cutter and pipe grip, bent**

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- head polished
- surface finish: chrome plated to standard EN12540
- heavy duty double - component handles
- made according to standard EN 60900

**Advantages:**

- the long bent jaws enable simple and precise clenching of nuts and screws
- the strong jaws enable good grip
- jaws bent to an angle of 45°
- gripping surface serrated

In collaboration with our users and various professionals from hand tools, a certain number of analyses and tests of pliers were carried out. The result is a comfortable use, perfect grip and reduced pressure on the hand itself.

## TBI handles for screwdrivers are composed of three layers, namely:

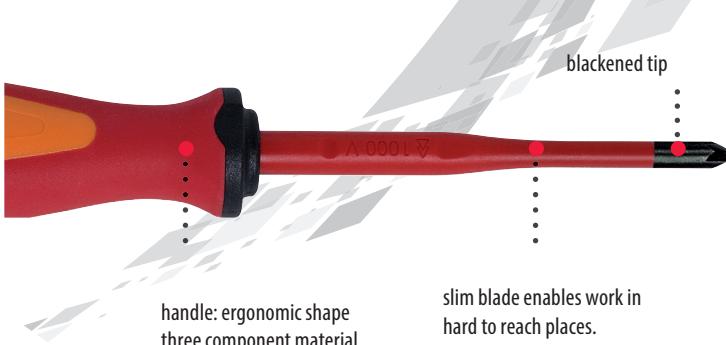

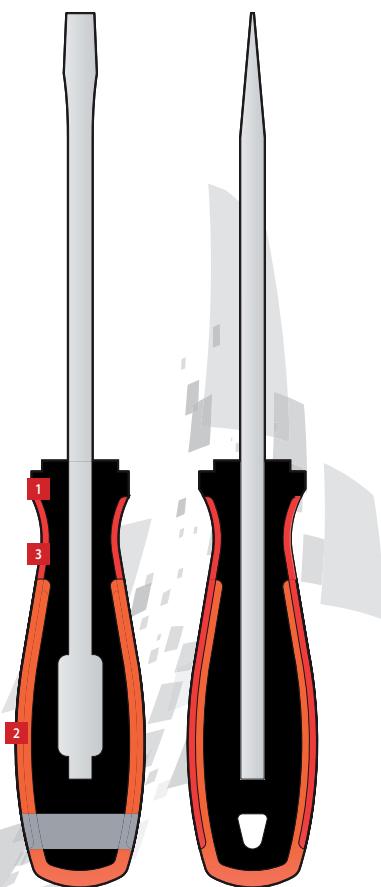

1. layer: black PP (polypropylene) which surrounds the stem of the screwdriver and is extremely solid, preventing the turning of the screwdriver stem in the handle at high torque
2. layer: orange PP (polypropylene) which surrounds the 1st layer of the handle is very stiff and ensures the constant shape of the handle under various environmental effects
3. layer: red TPE (thermoplastic elastomer) which partially surrounds the 2nd layer of the handle is a medium-strength material that gives the handle its final ergonomic shape, ensures a pleasant and non-slipping grip and thereby the achievement of high torques

Able to fit a variety of screw profiles and exhibiting innovative three-component handles, UNIOR screwdrivers ensure great efficiency and a slip-proof grip.

The screwdrivers are made of chrome-vanadium-molybdenum steel and are additionally chrome or nickel plated. The superior quality of materials used in the Unior line of screwdrivers is complemented by ergonomically designed handles to provide an excellent hold.

With its combination of soft and hard surfaces, the special, three-component handle – a Unior patent – ensures comfort and efficient performance with minimum strain on the wrist while working. The soft material ensures maximum grip even when oily.

Along with the varied consistency of the plastic handle practically eliminating the danger of the screwdriver slipping in the hand, the improved grip also ensures greater torque. This can also be achieved by inserting a rod in the perforation added with this purpose to all handles functioning also as a hanging hole for handier storage.

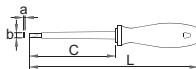

**604VDETBI****SLIM electrician's screwdriver with insulated blade, VDE TBI**

- blade: chrome-vanadium-molybdenum steel, entirely hardened and tempered
- blackened tip
- handle: ergonomic shape
- three component material
- hanging hole
- made according to standard EN60900

**Advantages:**

- model with slim blade
- Although of the slim blade, screwdriver enables the same functionality and safety by working as usual insulated screwdriver.
- slim blade enables work in hard to reach places.

## 385CVDEDP

### Insulated knife

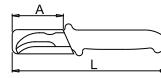

- blade from high alloy steel
- handles are insulated with double layered - double coloured insulation for additional safety
- surface finish: phosphated to standard DIN 12476
- with blade guard
- blade hardened at min. 55 HRc
- rounded blade, 60mm long
- ergonomic handle, with slip guard
- handle with finger hook for good transmission of force
- Material of steel blade provides maximum sharpness and durability by dismantling of cables
- blade protected with PVC protection

#### Usage:

- for dismantling PVC cable insulation

## Tool sets for easier choice

The composition of various sets is based on continuous cooperation with local professional users of insulated VDE Unior tools. Sets prepared in advance follow the needs of individual activity. Special sets of VDE tools for users dealing with electrical voltage have also been produced. It is a high quality selection of inexpensive tools.

### SOS tool tray

- We can produce SOS tool trays according to your needs and wishes
- Tell us your wishes and we will prepare an offer for you
- The trays are available with a thickness of 20, 30 and 40 mm
- In a blue/black colour combination
- Your tool carriage will never be untidy again
- The drawers only contain the tools that you need.
- 100% neatly organised
- You will immediately spot if something is missing.
- Quality design guarantees long-term use
- For extra-demanding work

## CABLE CUTTING, STRIPPING AND CRIMPING TOOLS

### Ergonomic handles

With ergonomic handles and a specially designed grip, surface Unior pliers provide maximum comfort at work and high efficiency with minimum strain.

### Surface protection

The pliers are made of excellent steel with special improved composition. Several models come with additional chrome surface protection.

### High precision

With their perfect design and technological superiority, Unior pliers ensure a high precision hold in any instance of general or dedicated use.

**380****Wire stripper**

- material: polyamide

**Advantages:**

- adjustable length stop of 5-12 mm
- easily accessible built - in side cutter for max. 2mm

**Usage**

- fully insulated automatic wire stripper for all common stranded and solid conductors of 0, 2-6mm<sup>2</sup>

|        |         |     |    |
|--------|---------|-----|----|
|        |         |     |    |
| 610925 | 0.2 - 6 | 117 | 1E |

**385H****Cable stripper with hook knife**

- material: polyamide

**Advantages:**

- no damage of the inner conductors can occur due to infinitely variable adjustment of the cutting depth
- the swivel blade automatically turn from circular to longitudinal cut

**Usage**

- accurate, fast and safe stripping of all common round cables of 4-28 mm<sup>2</sup>

|        |        |    |    |
|--------|--------|----|----|
|        |        |    |    |
| 610930 | 4 - 28 | 91 | 1E |

|        |    |    |
|--------|----|----|
|        |    |    |
| 623377 | 20 | 1E |

**385G****Cable stripper with straight knife**

- material: polyamide

**Advantages:**

- no damage of the inner conductors can occur due to infinitely variable adjustment of the cutting depth
- the swivel blade automatically turn from circular to longitudinal cut

**Usage**

- accurate, fast and safe stripping of all common round cables of 4-28 mm<sup>2</sup>

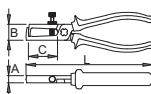

|        |        |    |
|--------|--------|----|
|        |        |    |
| 610931 | 4 - 28 | 92 |

**478/1BI****Wire stripping pliers**

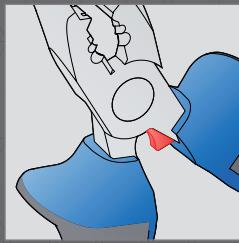

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- head polished
- surface finish: chrome plated to standard EN12540
- heavy duty double - component handles

**Advantages:**

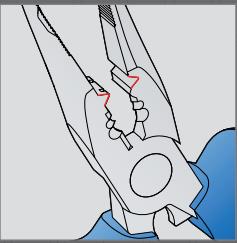

- spring for reopening
- stripping capacity: up to max 0.6 - 10mm<sup>2</sup>

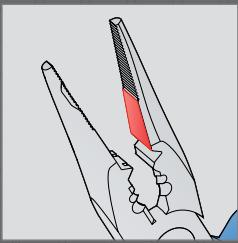

|        |     |        |    |   |    |     |    |  |
|--------|-----|--------|----|---|----|-----|----|--|
|        | L   |        | B  | A |    | C   |    |  |
| 607882 | 160 | 0.6-10 | 18 | 9 | 40 | 178 | 4B |  |

**514/1BI**

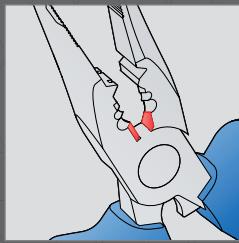

Crimping cable terminals up to Ø 4.0 mm.

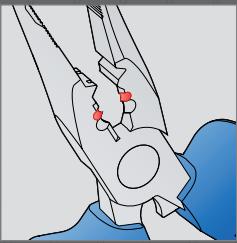

The pliers can be used for crimping insulated spade terminals.

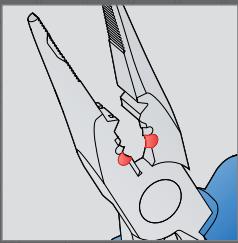

The ground part of the jaw is intended for gripping objects with sensitive surfaces.

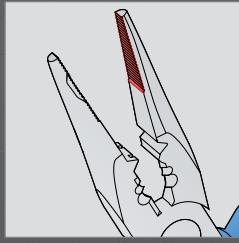

Cutting wires from Ø 2.2 mm to Ø 4.0 mm.

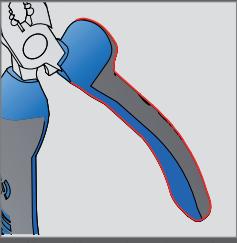

Stripping off insulations from Ø 2.2 mm to Ø 3.0 mm.

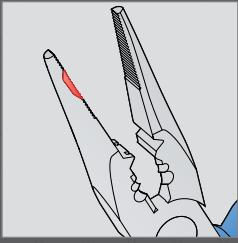

Stripping off insulations from Ø 3.5 mm to Ø 4.0 mm.

Multi-toothed jaw prevents slipping and enables a better grip of cables, wires etc.

heavy duty double - component handles

Winding hard wire and bending rings up to Ø 3.5 mm. Rings can be bent to the right or to the left, since the tool has appropriate teeth on both sides of the jaw.

## 514/1BI

### Multifunctional electricians pliers

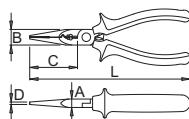

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- head polished
- surface finish: chrome plated to standard EN12540
- heavy duty double - component handles

#### Advantages:

- 7 different functions
- multi-toothed jaw
- ergonomically shaped handle
- extra strong grip
- Extra strong grip - the design and shape of the handles give the hand more leverage during use, enabling more stability and safer transmission of force.
- high durability
- Multi-toothed jaw prevents slipping and enables a better grip of cables, wires etc.

#### Usage

- Winding hard wire and bending rings up to Ø 3.5 mm. Rings can be bent to the right or to the left, since the tool has appropriate teeth on both sides of the jaw.
- The ground part of the jaw is intended for gripping objects with sensitive surfaces.
- The pliers can be used for crimping insulated spade terminals.
- Stripping off insulations from Ø 2.2 mm to Ø 3.0 mm.
- Stripping off insulations from Ø 3.5 mm to Ø 4.0 mm.
- Cutting wires from Ø 2.2 mm to Ø 4.0 mm.
- Crimping cable terminals up to Ø 4.0 mm.

## 427/4AG

### Crimp grip pliers

- material: sheet metal
- surface finish: phosphated to standard DIN 12476
- heavy duty double - component handles

#### Advantages:

- strong metal crimping profile with electrical plating
- reinforced connecting spring for longer usage life
- square crimping performs a better contact than traditional crimping profile

#### Usage

- for cord end sleeves 0,08 - 10mm<sup>2</sup>/AWG28 - 7

|        |     |    |
|--------|-----|----|
|        |     |    |
| 621550 | 433 | 1G |

**427/4CG****Crimp grip pliers**

- material: sheet metal
- surface finish: phosphated to standard DIN 12476
- heavy duty double - component handles

**Advantages:**

- special designed clamping jaws hold the wire securely during the stripping process

**Usage**

- swivel knob micro-adjusts for thinner wire to 30AWG ( $0.05\text{mm}^2$ ) or thicker wire to 8AWG ( $8\text{mm}^2$ )
- crimp non-insulated terminals 10-22AWG (1.5 to  $6.0\text{mm}^2$ )
- crimp insulated terminals 10-22AWG (1.5 to  $6.0\text{mm}^2$ )
- crimp auto ignition terminals 7 to 8mm

|        |     |    |
|--------|-----|----|
|        |     |    |
| 621552 | 378 | 1G |

**427/4DG****Modular crimping pliers**

- material: sheet metal
- surface finish: phosphated to standard DIN 12476
- heavy duty double - component handles

**Advantages:**

- exact crimping process due to parallel crimping

**Usage**

- for crimping 6- and 8-pole Western plugs type RJ 11/12 (9.65 mm width) and type RJ 45 (11.68 mm width)
- tool for cutting and stripping unshielded ribbon telephone cables
- with additional stripping device for round cables
- with length cutter and dismantling knife for ribbon cables 6 and 12 mm width

|        |     |    |
|--------|-----|----|
|        |     |    |
| 621553 | 401 | 1G |

**427/2FG****Crimp grip pliers**

- material: sheet metal
- jaws hardened to 38-40HRC
- very easy to handle

**Advantages:**

- hexagon crimping
- the respective cross-section is set by rotating profile disks
- Dented 6-position rotating dies 6, 10, 16, 25, 35, 50mm<sup>2</sup>
- lever transmission permits light force transfer

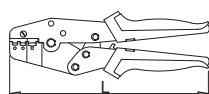

|        |        |      |  |    |
|--------|--------|------|--|----|
|        |        |      |  |    |
| 621555 | 6 - 50 | 1350 |  | 1D |

**428/4****Crimp lever pliers**

- material: sheet metal
- jaws drop forged from special tool steel, entirely hardened and tempered
- toggle joint ensures high compression pressure with little effort
- heavy duty plastic handles
- re-changeable head-spare part
- surface finish: phosphated to standard DIN 12476

**Usage**

- for insulated terminals (0,5-6mm<sup>2</sup>)

|        |         |     |     |    |
|--------|---------|-----|-----|----|
|        |         |     |     |    |
| 602327 | 0.5 - 6 | 240 | 575 | 1E |

**428.1/4****Spare parts for art. 428/4**

- spare head

|        |     |    |
|--------|-----|----|
|        |     |    |
| 602328 | 161 | 1E |

**428/4AGPB****Set of grip crimp pliers with exchangeable jaws in plastic box**

- material: sheet metal
- surface finish: phosphated to standard DIN 12476
- heavy duty double - component handles
- Dimension of box: 307 x 260 x 55

**Advantages:**

- ratchet crimp system ensures reliable work
- quick changing system for 4 different types of jaws

**Usage**

- for insulated terminals AWG10-12/14-16/18-22 (4-6/1.5-2.5/0.5-1.0mm<sup>2</sup>)
- for non-insulated terminals AWG14-6 (0.2-16mm<sup>2</sup>)
- for cord end terminals AWG22-6 (0.5-16mm<sup>2</sup>)
- for BNC/TNC coax connectors RG-58, RG-59/62. Hex connectors 0.255 (6.48mm<sup>2</sup>), 0.213 (5.41mm<sup>2</sup>), 0.068 (1.73mm<sup>2</sup>)

- tool steel jaws, oil hardened, phosphated
- handles nickel plated
- toggle joint ensures high compression pressure with little effort

**Usage**

- for insulated terminals ( $0,5\text{-}6\text{mm}^2$ ), for cutting cables and wires

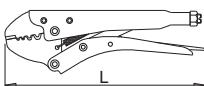

| Barcode | MPN     | L   | Weight | Code |
|---------|---------|-----|--------|------|
| 601138  | 0.5 - 6 | 220 | 512    | 1E   |

**426/3B****Crimp - grip pliers**

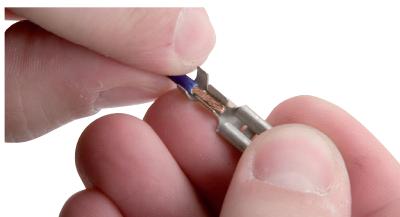

- material: sheet metal
- tool steel jaws, oil hardened, phosphated
- toggle joint ensures high compression pressure with little effort
- handles nickel plated

**Usage**

- for non insulated terminals ( $0,5\text{-}10\text{mm}^2$ ), for cutting cables and wires

| Barcode | MPN      | L   | Weight | Code |
|---------|----------|-----|--------|------|
| 601139  | 0.5 - 10 | 220 | 484    | 1E   |

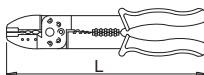

**425/4A****Crimping pliers**

- material: sheet metal
- entirely hardened and tempered
- surface finish: phosphated to standard DIN 12476
- heavy duty plastic handles

**Usage**

- for insulated and closed non insulated terminals ( $1,5\text{-}6\text{mm}^2$ ), for cutting cables, screws and stripping insulation

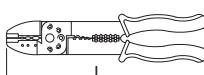

|        |         | L   |     |  | IE |
|--------|---------|-----|-----|--|----|
| 601136 | 1.5 - 6 | 240 | 320 |  |    |

**425/4B****Crimping pliers**

- material: sheet metal
- entirely hardened and tempered
- surface finish: phosphated to standard DIN 12476
- heavy duty plastic handles

**Usage**

- for insulated and non insulated open terminals ( $1,5\text{-}6\text{mm}^2$ ), for cutting cables, screws and stripping insulation

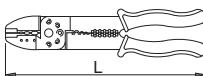

|        |         | L   |     |  | IE |
|--------|---------|-----|-----|--|----|
| 601137 | 1.5 - 6 | 240 | 320 |  |    |

**425/4AB****Crimping pliers**

- material: sheet metal
- entirely hardened and tempered
- surface finish: phosphated to standard DIN 12476
- heavy duty plastic handles

**Usage**

- for non insulated standard and closed terminals ( $1,5\text{-}6\text{mm}^2$ ), for cutting cables, screws and stripping insulation

## TOOLS FOR ELECTRONIC

### Precision

Tools for electronic use are distinguished by precision of manufacture and excellent functionality, which guarantees a complete match with the object being worked on, even in hard to access places.

### Effectiveness

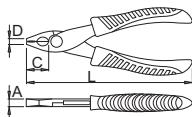

The tool provides several functions, such as cutting, removing and pressing cables, which makes work faster and without additional physical strain.

## 406/4E

**Electronic combination pliers**

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- heavy duty double - component handles

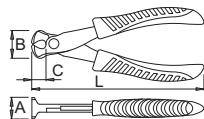

| Barcode | L   | B    | C    | A   | Weight | Code |
|---------|-----|------|------|-----|--------|------|
| 620069  | 120 | 13.6 | 15.8 | 8.2 | 90     | 4B   |

## 455/4E

**Electronic pliers - front cutter**

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- heavy duty double - component handles

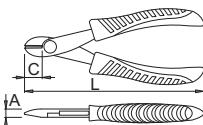

| Barcode | L   | B    | C   | A    | Weight | Code |
|---------|-----|------|-----|------|--------|------|
| 620071  | 110 | 16.6 | 8.1 | 13.2 | 94     | 4B   |

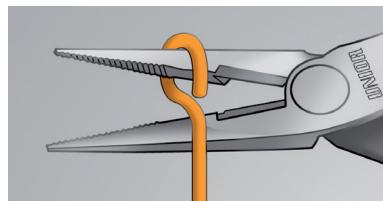

461/4E

**Electronic side cutter**

- material: special tool steel
- drop forged, entirely hardened and tempered
- heavy duty double - component handles

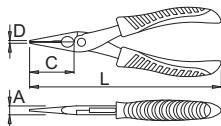

| Barcode | L   | B  | A   | C    |  |  | 4B |
|---------|-----|----|-----|------|--|--|----|
| 620072  | 115 | 13 | 8.2 | 13.5 |  |  |    |

508/4E

**Electronic long nose pliers, straight**

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- gripping surface serrated
- heavy duty double - component handles

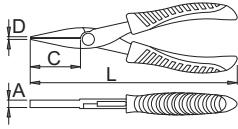

| Barcode | L   | B    | D   | A   | C    |  |  | 4B |
|---------|-----|------|-----|-----|------|--|--|----|
| 620074  | 135 | 12.6 | 3.2 | 2.4 | 32.5 |  |  |    |

472/4E

**Electronic flat nose pliers**

- material: special tool steel
- drop forged, entirely hardened and tempered
- gripping surface serrated
- heavy duty double - component handles

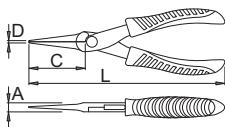

| Barcode | L   | C    | A   | Weight | Box |
|---------|-----|------|-----|--------|-----|
| 620070  | 135 | 32.5 | 8.2 | 105    | 4B  |

506/4E

**Electronic long nose pliers**

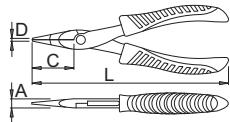

- material: special tool steel
- drop forged, entirely hardened and tempered
- heavy duty double - component handles

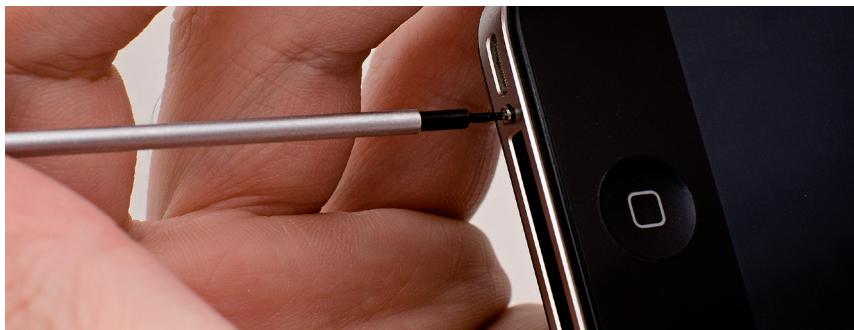

| Barcode | L   | B    | D   | A   | C    | Weight | Box |
|---------|-----|------|-----|-----|------|--------|-----|
| 620073  | 140 | 12.6 | 3.2 | 2.4 | 41.8 | 99     | 4B  |

**Electronic long nose pliers, bent**

- material: special tool steel
- drop forged, entirely hardened and tempered
- heavy duty double - component handles

| Barcode | L   | B    | D   | A   |    |    |
|---------|-----|------|-----|-----|----|----|
| 620075  | 140 | 12.6 | 3.2 | 8.2 | 97 | 4B |

**Electronic Screwdriver with TS profile**

- material: blade - chrome vanadium, entirely hardened and tempered
- ergonomic heavy duty double component handle
- tip coated with anticorrosion protection
- handle with rotating cap
- for pentalobe screws
- use: for newer models of apple iphones

| Barcode |  | C    | L  | D   |     |    |
|---------|--|------|----|-----|-----|----|
| 623364  |  | TS 1 | 60 | 153 | 2,5 | 13 |

## 621E

## Electronic screwdriver with TX profile

- material: blade - chrome vanadium, entirely hardened and tempered*
- ergonomic heavy duty double component handle*
- tip coated with anticorrosion protection*
- handle with rotating cap*

| Barcode | *     | C  | L   | D   | Ø  | Box |
|---------|-------|----|-----|-----|----|-----|
